

ANA Bond-SE™

Self-Etch, LC bonding

ANA Bond-SE™ is the 7th generation one component LC, one step etching and bonding.

This bonding ensures a safe and strong adhesion and saves time thanks to the self-etch effect for direct restorations. If and when used with indirect restoration, as cementing metal or ceramic crowns, prior etching is needed.

INDICATIONS

- Adhesive to all material
- Direct or indirect restorations
- Sealing dentin

PROPERTIES

- High adhesion
- Long-term lasting
- One step etching/bonding
- Methacrylate

ASSORTMENT

-ANA Bond-SE™, 1 x 5ml 1322000
